

Trādiance Classifier™ for Apparel

Automated Apparel and Accessory Classification

The fastest, most accurate way to classify apparel and apparel accessories

Are you still classifying apparel the “old fashion way”?

Today’s competitive and compliant companies are using automation – shouldn’t you?

Feeling the Pressure?

Whether you want to do it or not, the work must be done. CBP reviews can happen at any time, and incorrect classifications can cost big in terms of delays, extra duties and penalties. If time is being spent on it, why not do it in the most time efficient and accurate way possible? **What if apparel classification was so easy and automatic that you didn’t have to think about it – and got the right answer?**

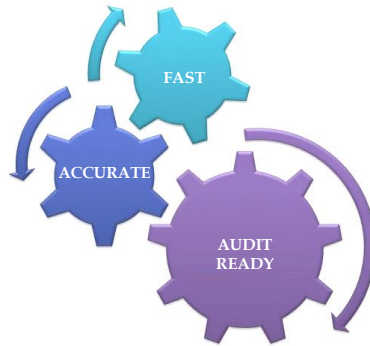

There’s a better way

Manually classifying apparel is a slow and time consuming process - and it lacks the complete audit trail that demonstrates reasonable care. **In just 2 minutes, smart companies are able to classify apparel with 99% accuracy, have a complete audit trail automatically generated, and share their important data with everyone who needs it!** These companies are more competitive, more compliant, more accurate and more productive than companies classifying the “old fashion way”.

Trādiance is proven to be the fastest and most accurate automated apparel classification system on the market – and it covers accessories (jewelry, hats, belts, etc.) as well! But it’s not just about speed and accuracy. Every classification is backed by a complete audit trail ready for any CBP inquiry.

This is Best Practices at its best!

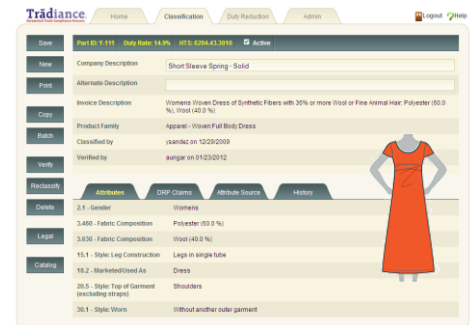

Don’t get left behind

Automated apparel classification costs less than 25% of a comparable manual classification. Companies reward initiative, innovation, and increased productivity. They are always looking for ways to save time and money. You owe it to yourself and your company to automate your apparel classification process. Not only will automation make your life easier by freeing your time for other

important trade compliance activities, it also creates a bulletproof audit trail and the reasonable care that U.S.

Customs loves.

Automation is the latest and most advanced approach to classifying apparel and accessories, and is proven to increase the efficiency and accuracy of your classifications.

Trādiance also provides...

- relevant attribute identification to keep you focused on just the important information for classification
- a complete electronic audit trail for each classification including Who, When, and How
- easy access to your entire classification database, including integration with your internal systems
- legal support from the world’s leading experts in HTS classification, Zisser Customs Law Group
- a gallery of selectable images to increase efficiency without sacrificing accuracy

There is absolutely no better option.
